

## *Climate Change Framework*

Charles Darwin – “It is not the strongest that survive,  
but the most adaptable to change”

## *Climate Change Framework*

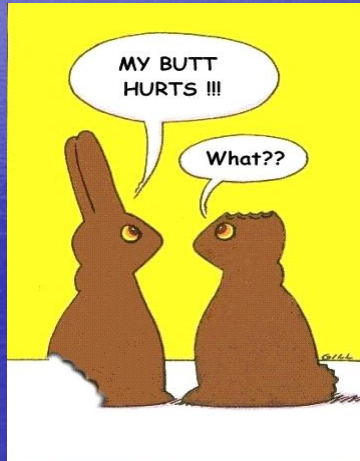

- Today's challenge??
- Water safety and lifesaving organisations are in a very powerful position to provide leadership in the communities adaptation process.

## *Climate Change Framework*

Context:

Life is full of competing needs and conflicting opinions!

## *Climate Change Framework*

Impact of, and adaptation to, climate change –

- Disrupt the orderly provision of facilities and programs;
- Create socio-cultural tensions between sporting clubs and between leisure-based groups;
- Adversely impact recreational opportunities associated with the natural environment;
- Create financial and logistical impediments for facilities managers; and,
- Disadvantage remote and regional communities relative to those in larger population centres better able to adapt to adverse impacts.

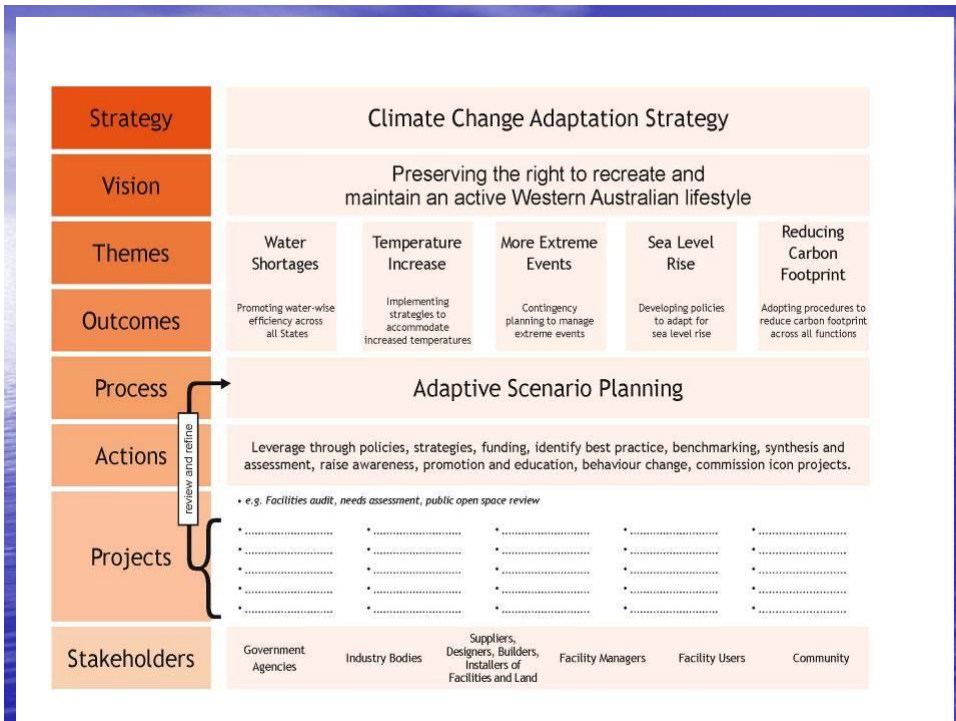

# Climate Change Framework

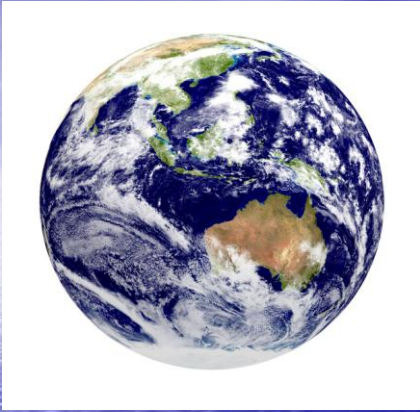

Plenty of information!!

Where to start??

***Climate Change  
Framework***
